

MICHAEL PHELAN'S IMPROVED

BILLIARD

TABLES

AND COMBINATION CUSHIONS.

Protected by Letters Patent, dated Feb. 19, 1856; Oct. 28, 1856; Dec. 8, 1857; Jan. 12, 1858; Nov. 16, 1858, and March 29, 1859.

The recent improvements in these Tables make them unsurpassed in the world. They are now offered to scientific Billiard players as combining speed with truth, never before obtained in any Billiard Table.

Salesrooms, Nos. 786 and 788 Broadway, New York.
Manufactory, Nos. 65, 67, and 69 Crosby Street.

THE AMERICAN PUMP.

Patented, April 5, 1859.

WITHOUT SUCTION, WITHOUT PACKING.

This is a *Double Acting Force Pump*, with but one bore and one Piston, worked by a tee piece, having as much leverage and less friction in its working than any other pump heretofore invented.

The working parts all stand *under the water*, as does the air-chamber, beyond the reach of careless or malicious interference or frost; there is no loss of water and no loss of labor in *any depth*—a constant flow of water is kept up. The different sizes—five in all—work in diameters of from 14 to 24 inches, and cost \$15, \$20, \$25, \$40, and \$60 each,

are worked by hand, horse, water, wind, or steam; adapted to cisterns, wells, tanks, machinery, engines, mines, railroads, or docks, forcing water under or above ground to great heights and distances. It has now been in *successful operation* for eight months, in every depth from 8 to 100 feet, commencing at Maine and extending to the Rio Grande, and in New Brunswick and Cuba.

"This is a new Pump which is offered for public favor. Those who have used it speak highly of it."—*N. Y. Observer*.

"The piston discharges at both ends into the air-chamber, causing a regular flow of water at the discharge pipe at top. If preferred, every part can be galvanized, except the piston, which keeps itself clean, and is proof against rust."—*N. Y. Evangelist*.

"This is a new invention, being exceedingly simple, rendering the labor of working it, on account of the very small amount of friction in its working parts, very trifling in comparison to other Pumps of a similar nature."—*N. Y. Christian Advocate and Journal*.

"As a specimen of the ease and efficiency with which this Pump works, we can state that one man, working regularly, forced water from this Pump a distance of 540 feet, being 97 feet perpendicular height."—*Scientific American, N. Y.*

"One of these Pumps now in use in this vicinity, enables us to state that full confidence can be placed in the statement contained in the advertisement."—*Presbyterian Banner and Advocate, Pittsburg, Pa.*

WASHINGTON FEMALE INSTITUTE,

UNDER THE DIRECTION OF

MRS. ELIZA W. SMITH,

Late Principal of Mystic Hall Seminary.

MRS. SMITH takes pleasure in giving notice that the additional buildings, gymnasium, and riding grounds on the estate of Surgeon-General LAWSON, adjoining Secretary THOMSON'S, are finished, and she has opened with a corps of experienced teachers.

Every facility is afforded for a thorough education, those professors and teachers only being employed who possess a tact for teaching, and have acquired great erudition and a distinguished reputation in their respective departments.

The course of instruction embraces the Ancient and Modern Languages, the higher Mathematics, and the various branches of a solid English education.

Among the authors taught are Sherwin's Algebra, Davis' Legendre's Geometry and Trigonometry, Cartee's Physical Geography, Weber's History, Kames's Criticism, Cleveland's English Literature, Whateley's Morals and Christian Evidences, Thompson's Outlines of the Laws of Thought, Butler's Analogy, and Haven's Mental Philosophy.

The Graceful Department comprises Music, Drawing, Painting, Dancing, Manners, Carriage, and Conversation generally. Several private collections of pictures, shells, birds, coins, &c., have been kindly offered for the gratification and improvement of the Young Ladies.

A valuable Library is always accessible to the young ladies, and the Maps, Globes, Chemical and Philosophical Apparatus furnish ample means of illustration in school. Distinguished gentlemen are engaged to lecture upon Anatomy, Chemistry, Natural Philosophy, Astronomy, and History, with diagrams and apparatus.

Applications will be answered and pupils received until the limited number is complete; and parents and guardians may be assured that no efforts or appliances will be wanting to secure the comfort, thorough instruction, and elegance of their daughters and wards, *while the utmost strictness and exclusiveness will be observed.*

The young ladies will have the advantage of attending the lectures of the SMITHSONIAN INSTITUTE, and of visiting the places of interest and instruction which are found only in the Federal metropolis.

MUTUAL FIRE INSURANCE COMPANY

OF THE DISTRICT OF COLUMBIA,

CHARTERED BY CONGRESS.

Capital \$125,000, securely invested.

This Company offers to the property holders of the District the same protection as other Companies, at about two-thirds of the cost, and they receive back one-half of the amount paid by them, in case the Company meets with the same success as for the past five years that it has been doing business, which has shown the actual cost of insurance of first class risks to be less than 10 cents on the \$100.

The insured becomes a member at certain fixed and uniform rates, for which he gives a deposite note, interest payable annually in advance, to form a fund for the payment of losses. All payments are placed to the credit of the insured, and after losses and expenses are deducted, any savings that may accrue are returnable, agreeably to the Charter and By-Laws, without deduction, and with interest thereon.

The fact that all of the Insurance Companies of the District are declaring large dividends to their stockholders, at once shows the great profit on their premiums, and the consequent saving to persons insuring with this Company.

WASHINGTON, D. C., November 28, 1848.

To all whom it may concern:

During the time I have filled the office of Commissioner of Patents, and for some time previous, ZENAS C. ROBBINS, Esq. has followed the business of Patent Solicitor in this city, and has been in the daily prosecution of business in the line of his profession, at the Patent Office.

I am well acquainted with Mr. ROBBINS personally, and believe him to be a man of integrity and ability, to whom persons at a distance may safely entrust their business. I am pleased to have the opportunity to say that he is faithful to the interests of his clients, and has been, thus far, very successful in the practice of his profession.

WASHINGTON, D. C., August, 1857.

Citizens of the United States visiting foreign countries are liable to serious inconveniences, if unprovided with authentic proof of their national character. Their best safeguard is a passport from this Department, certifying the bearer to be a citizen of the United States.

Persons who leave the country expecting to obtain passports whilst abroad, from the Diplomatic or Consular Agents of the United States, are liable to disappointment; inasmuch as it is the duty of those agents not to grant documents of that character, except to persons who are certainly known to be entitled to them; and it is sometimes difficult, if not impracticable, to procure proof of this fact in a foreign country.

Certificates of citizenship or passports issued by State authorities, or by Judicial or Municipal functionaries of the United States, are not recognized by the officers of foreign governments; and by the twenty-third section of the act of Congress, approved on the 18th of August last, it is made penal for such authorities and functionaries to issue such passports.

LILLIE'S PATENT CHILLED IRON BURGLAR AND FIRE PROOF SAFES AND BANK LOCKS.

The losses sustained by Bankers and Merchants during the past ten years, must have convinced the public that something more reliable than sheet iron safes were necessary for protection against the force and skill of the burglar. A few years since, Mr. LEWIS LILLIE, of Troy, N. Y., turned his attention to the manufacture of a Safe and Lock that should be what the public security demanded, viz.: perfect protection against Fire and the skill of the Burglar.

His Chilled Iron Safe and Combined Permutation and Combination Lock were the result of his careful study and mechanical ingenuity. That he proved equal to the task, is fully shown by the universal favor his work has received from the principal bankers and merchants in New

York, Philadelphia, Baltimore, Charleston, Savannah, New Orleans, St. Louis, and all principal cities and towns of the country. We feel confident that upon a careful examination of the many merits of these Safes and Locks, to which the public are respectfully invited, our claim of producing the only Fire and Burglar Proof Safe will not be considered unwarranted. We invite the fullest examination, confident that when the difference between our Chilled Iron Safes and the sheet iron boxes is once fully understood, no prudent man will hesitate which to rely upon for the protection of his property. We also invite an examination to a list of over two hundred of the principal bankers throughout the country, now using this work. We would add that we are now supplying more bank work than all the rest of the Safe makers put together.

Every Scale warranted.
Cor. Dev St., N. York

Are respectfully offered to the public as the most simple and reliable Scales ever put into use.

Their principal advantages are as follows:—Great simplicity of construction.

Perfect reliability under the severest tests.

Their compactness enables them to be used without the construction of a deep pit; a great desideratum where the ground will not admit drainage; in addition to which, much expense is saved.

It is hardly possible for these Scales to get out of order; no jarring of the platform in any way affects the working part of the Scale.

We can furnish at short notice,

RAILROAD TRACK SCALES; RAILROAD DEPOT SCALES;
HAY AND CATTLE SCALES; DROP LEVER SCALES;
DORMANTS; PORTABLE DROP LEVERS; WAREHOUSE, OR PORTABLE SCALES; UNION AND GROCERS' SCALES, AND POST-OFFICE BALANCES.

Call and examine these Scales, and the Certificates from hundreds of the first mercantile firms throughout the country.

STREET DIRECTORY.

THERE are 1170 blocks or squares, bounded by 21 *Avenues* and over 100 *Streets*. The Capitol is the division of all the alphabetical and numeral streets. The A, B, C streets, having North affixed to them, are on the north side of the city, running from east to west, divided by Capitol Street from the A, B, C streets on the south side, which have South affixed to them, and which run parallel with the north A, B's, &c., thus making duplicate streets, but particularly differing from each other with the "north" and "south" attached.

The numeral streets, called East 1st, 2d, and West 1st, 2d, 3d, &c., run north and south, and are divided into East and West by Capitol Street, which runs directly through the centre of the city; one end is called South Capitol, the other North Capitol. The numeral streets cross the alphabetical and the avenues. There are duplicates of these streets, as well as those of the alphabetical, but distinguished from each other by East and West.

J. W. BARNACLO, JUSTICE OF THE PEACE,

And Agent for the Collection of Claims.

Office, No. 388 9th St., between I and New York Avenue,

WASHINGTON CITY, D. C.

Deeds and other Instruments of Writing carefully prepared. Accounts and Claims promptly attended to. Merchants' Books adjusted and posted.

Having had much experience in the keeping of books for Merchants, Railroad and Canal Companies, J. W. B. flatters himself that he is fully competent to adjust accounts and arrange books, no matter how intricate and complicated.

VISITORS TO WASHINGTON WILL FIND AT THE METROPOLITAN BOOK STORE ALL THE ELEMENTS OF A FIRST CLASS ESTABLISHMENT.

The stock includes a choice selection of standard and other works, American and English Stationery (the latter of extra fine qualities, not usually kept), and every article connected with the trade. In addition, there is a

FINE ART GALLERY

at the rear of the Store, containing a varied collection of Oil Paintings, Sculpture, Water-color Drawings, Photographs, Chromo-Lithographs, and Engravings, the inspection of which is respectfully invited.

NATIONAL OBSERVATORY, situated on E north, cor 23d west, a beautiful site upon an eminence about a mile west of the President's House. One of the finest views in the neighborhood of the city can be had from its location. It was erected during the administration of Mr. Polk, and has already become one of the most celebrated institutions of our government.

Lieutenant Maury, its superintendent, enjoys a world-wide reputation as a scientific and practical man, and it is principally to his exertions and skill that its celebrity is due. Already it ranks among the first institutions of the kind in the world.

By it is regulated the time of the city and government, and from it is calculated the latitude and longitude of the Western Hemisphere. Its astronomical apparatus is excellent, and some discoveries have been made here of vast importance to the scientific world.

Smithsonian Institution.

This Institution is named after its illustrious founder, James Smithson, Esq., of England, son of the first Duke of Northumberland. He died at Genoa, June 27, 1829, at the age of 64 years, leaving a fortune of £120,000.

By his will he directed that the income of this property (after deducting some small annuities), should be paid to his nephew, Henry James Hungerford, during his life, and that the property itself should descend to his children, if he had any, absolutely and forever.

"In case of the death of my said nephew, without leaving a child or children, or of the death of the child or children he may have had, under the age of twenty-one years, or intestate, I then bequeath the whole of my property (subject to an annuity of £100 to John Fitall, and for the security and payment of which I mean stock to remain in this country) to the United States of America, to found at Washington, under the name of the Smithsonian Institution, an establishment for the increase and diffusion of knowledge among men."

Young Hungerford died at Pisa on the 5th of June, 1835, without issue. The event thus occurred in which the claim of the United States attached.

Hon. Richard Rush, of Philadelphia, was by the President appointed the agent of the United States. He proceeded to England, recovered the fund, and paid it into the treasury of the United

States, in sovereigns, during the month of September, 1838.

The site selected for this institution is on the fine open mall on the Island, and near the Washington monument. The building is of stone, and in the modern Norman style of architecture.

Military Asylum—is situated upon a high eminence about three miles from the city. This is the new Military Asylum, established by Act of Congress passed in 1851.

The ground was purchased and building erected by the "prize money" that had fallen into the hands of the American army during the Mexican war. It was contemplated to have distributed this "prize money," but was found such a de-

sign would be difficult to consummate, and be unsatisfactory, as many soldiers were dead, others had left the service, and all traces of them were lost. General Scott then suggested the propriety of establishing this Asylum as a home for disabled and destitute soldiers, the prize money to be used as a basis—hence the Military Asylum.

Georgetown College.

In the year 1785, several gentlemen—the principal of whom was the Rev. John Carroll, after-

wards the first Archbishop of Baltimore—formed a design of building "An Academy, at Georgetown, Potomac River, Maryland." In 1789 the first house was built; in 1792 the schools commenced, and in 1798 we find it "The College of Georgetown, Potomac River, State of Maryland." In May, 1815, Congress raised it to the rank of a University.

In May, 1851, "The Medical Department of Georgetown College" was opened in Washington City, D. C.

The College is situated on the northern bank of the Potomac, and commands a full view of Georgetown, Washington, the Potomac, and a great part of the District of Columbia. Its situation is peculiarly healthy.

The academic year commences on the first Monday of September, and ends about the middle of July. The collegiate course of studies occupies, generally, seven years, inclusive of the preparatory classes, which last three years, unless the proficiency of the student authorizes an abbreviation of the term.

The College possesses a Select Library of twenty-four thousand volumes, amongst which there are many very curious and rare works. There are one hundred volumes printed between the years 1460 and 1520. Three manuscripts written before the year 1400, and one written in 1620. There is a good philosophical apparatus, for the use of the advanced students.

The Museum contains an elegant and well-arranged cabinet of Minerals; and many Geological specimens, besides an extensive collection of shells.

Attached to the College, at a distance of about 400 yards, is an Astronomical Observatory, sixty feet long and thirty feet wide, divided from east to west into three rooms. The eastern room contains a first-class Meridian-Circle, by Troughton & Simms, of London. The divided arc of the circle has a diameter of 45 inches, reading by microscopes to fractions of a second of arc. The telescope has a 4-inch glass. A fine sidereal clock, by Molyneux, of London, accompanies this instrument. In the western room is mounted a fine Transit-Instrument, by Ertel & Son of Munich. It is seven feet long, and has a $4\frac{1}{2}$ -inch object glass, and has in the room with it a sidereal clock. The middle part of the observatory is three stories high, and covered with a rotary dome. The dome room contains a well-mounted Equatorial Telescope, made by Troughton & Simms. This instrument has a 4 8-10-inch object-glass, giving powers from twenty-five to four hundred. Besides the above, there are five portable Astronomical Instruments, and a library of five hundred choice works on Astronomy, Mathematics, and the Physical Sciences.

Georgetown Female Seminary.

Located at 118 Washington street. Principal: Miss M. J. Harrover.

The Seminary Buildings possess conveniences and facilities for the accommodation of boarding pupils. The location is high and healthy, and the fine grounds and broad covered balconies afford ample means for exercise and amusement.

The Scholastic year consists of two terms of twenty-two weeks each, both closing with an examination.

Georgetown Gas Light Company.

23 Green street. President and Treasurer: David English. Secretary: Henry King. Directors: Robert P. Dodge, Richard Pettit, W. F. Seymour, A. H. Pickrell, Henry King, Geo. Waters, of Georgetown; William Bucknell, of Philadelphia.

Georgetown Public Schools.

Situated Montgomery near Bridge.

The Public Schools of Georgetown were established in the year 1810, upon the Lancasterian system, the male department being under the superintendency of the late Robert Ould, sr., and the female department under the late Mrs. Guy. The former retained his position until death summoned him away in the year of 1840, when his son, Robert Ould, jr., assumed the duties of his place for a few months, when he resigned to enter upon his career as a lawyer. Mr. Thomas Wilson was elected to fill the vacancy, and continued at the head of the school until the schools were reorganized in 1842, when the present system was introduced and the old Lancasterian plan abolished. Mr. Samuel Kelley was elected as principal teacher, and Mr. John T. Bangs as assistant teacher—Mrs. Guy still retaining her charge of the female department of the Georgetown school. Mr. Kelly resigning his position, Mr. J. T. Bangs was elected to fill his place. Mr. G. P. Hilleary was elected as assistant. Mr. Bangs resigned in 1849, when the present incumbent, W. H. Craig, was elected to fill the vacancy. The school at present is divided into four departments or separate and distinct schools, all in a highly flourishing and prosperous condition, under the following management:

Principal Male Department: W. H. Craig. Primary Department to same: Miss Ann Jewell. Principal Female Department: Mrs. E. Farquhar. Assistant Female Department: Miss M. I. Good. Board of Guardians appointed annually by the Corporation on the first Monday in January of each year.—President: G. W. Beall. Secretary: John T. Bangs. Henry King, J. W. Deeble, J. A. Magruder, W. H. Tenney, W. C. Magee.

Mr. Craig was at one time assistant to J. T. Bangs; Mr. S. Goldberg was at one time assistant to J. T. Bangs; Mr. Jas. A. Burns was at one time assistant to W. H. Craig.

The school-house is large and commodious, and has lately been put in thorough repair, and is the most comfortable in the District, and a credit to the fostering care of the present Board of Guardians.

The Ladies' Academy of the Visitation.

Fayette, corner of Fourth street. This Academy was founded in the year 1799, and has for more than half a century, enjoyed a reputation second to no female institution in the country. It is located on the heights, commanding a view of the Potomac, and a distant perspective of Washington City. The situation is healthy and picturesque.

The grounds attached to the Academy are extensive and afford ample means for the healthy recreations and innocent amusements of the scholars.

The course of instruction comprises drawing, painting, needle-work and embroidery, music, a complete historical course, the languages, and the various branches of polite literature. The academic year commences on the first Monday of September, and ends about the middle of July. It is divided into two sessions.

CHESTNUT GROVE WHISKEY,

The purest Medicinal Agent ever known,

Has furnished the community a Stimulant, pure, healthful, and invigorating, at the same time a mild, delicious beverage. It is calculated to do away with the vile drugged stuff that is palmed off on the community, and which is injurious to body and mind. In addition to the certificates beneath, he has received a Diploma from the STATE AGRICULTURAL SOCIETY, and additional testimony from DR. JACKSON, of Boston, who testifies under oath to its absolute purity.

CERTIFICATES.

We have carefully tested the sample of Chestnut Grove Whiskey which you sent us, and find that it contains none of the poisonous substance known as Fusel Oil, which is the characteristic and injurious ingredient of the whiskeys in general use.

BOOTH, GARRET & CAMAC, *Analytical Chemists.*

NEW YORK, Sept. 3, 1858.

I have analyzed a sample of Chestnut Grove Whiskey, received from Mr. Charles Wharton, Jr., of Philadelphia, and having carefully tested it, I am pleased to state that it is entirely free from poisonous or deleterious substances. It is an unusually pure and fine flavored quality of whiskey.

JAMES R. CHILTON, *Analytical Chemist.*

BOSTON, March 7, 1859.

I have made a chemical analysis of commercial samples of Chestnut Grove Whiskey, which proves to be free from the heavy Fusel Oils, and perfectly pure and unadulterated. The fine flavor of this Whiskey is derived from the grain used in manufacturing it.

Respectfully,

JUST ISSUED, THE FOURTH EDITION OF

Grobe's New Method for the Piano.

Op. 1100.

BULLETIN OF TESTIMONIALS

In favor of this unique work, which has already attained an unprecedented popularity.

FROM "THE MUSICAL REVIEW," NEW YORK.

"We must confess that we are naturally not very favorably inclined to new methods for the piano. We have had so many instructions during the last twenty years that we really think mankind ought, at least, to know how to play the piano-forte. However, Mr. Grobe's book has somewhat altered our mind. It offers really something new, containing some truth we have not met with until now in any other method. It adheres for once to the principle 'THINGS BEFORE SIGNS.' He justly says, 'The *reality* (playing) should come first, and the things which belong to *notation* should follow.' This is excellent. This is just. This is true and natural. The whole system is based upon this principle—always with special regard to the primary instruction in the art of playing the piano. It is for this reason that such matters as belong to a more advanced period in the player's art are excluded, and will follow in another book. The music in the book practically illustrates the principle of the author. The whole is to the point, and will be found extremely useful."

FROM "THE MUSICAL WORLD," NEW YORK.

"First, we find a very sensible preface, in the course of which a list is given of the most distinguished of his predecessors in the book-making and piano-teaching profession—the date of their birth and death being not forgotten. Mr. Grobe is doubtless better posted in the matter of musical biography than any other musical man. We find, next, some excellent advice to teachers, which we should like to transcribe to our columns, had we space. Mr. Grobe's admirable book is, on the whole, heartily to be recommended to the musical public."

FROM "FITZGERALD'S CITY ITEM," PHILADELPHIA.

"Grobe's New Method for the Piano-forte has met with unprecedented favor, over six thousand copies having been ordered in two weeks. This is a success as remarkable as it is well deserved, for the work is one of genuine and enduring merit. It would surprise greatly if his book did not sell—like what?—why, like Grobe's music, of course, and nothing else!"

FROM "THE DAILY PICAYUNE," NEW ORLEANS.

"Mr. Grobe stands very high as a professor and teacher, and composer for the piano. The book he now gives to the public bears upon its face, to every experienced and practised eye, conviction that there is a valuable addition to the rudimentary musical lore of the country and the world. A better primary instructor in the art, and especially in the science of piano playing, has never before been published."

FROM "THE DAILY ADVERTISER," DETROIT.

"Lee & Walker, Philadelphia, have just published a new work of instruction, prepared by the eminently musical writer, Charles Grobe, whose excellence in this department has a world-wide fame. We are assured that the system of elementary teaching introduced by it is simple, clear, progressive, and judicious; and, while it is extremely practical, it is also extremely attractive. The work contains ten engraved figures, illustrating the different positions of the hand and fingers, and its typographical appearance is very inviting."

FROM "THE PUBLIC LEDGER," PHILADELPHIA.

"Lee & Walker have published Professor Charles Grobe's New Method for the Piano, which is one of the best elementary works upon the subject extant. Mr. Grobe is a thorough master of his subject, and he leads the pupils pleasantly through the task, by making it clear, simple, progressive, and practical."

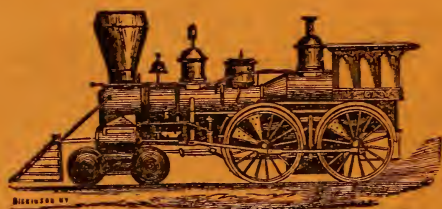

FROM "THE COMMERCIAL ADVERTISER," BUFFALO, N. Y.

"Mr. Grobe is already well known as the composer of probably more music than any other single composer now living, his present work being numbered 1100. We have not had time to examine the merits of Mr. G.'s new method, but his great success, both as composer and Professor of the Piano-forte, warrants the belief that his last work may be regarded as a valuable addition to the list of instruction books."

His office is deficient in none of the appointments of a complete establishment; and hence possesses all the facilities for the

MANUFACTURE OF A COMPLETE BOOK.

He is also the printer of **PROF. J. B. AIKIN'S**

CELEBRATED SYSTEM OF MUSICAL NOTATION.

The popularity which this system has acquired for its completeness, and for the unexampled facility with which it can be learned by the dullest student of music, sufficiently indicates its character. Its pre-eminent value consists in its **SIMPLICITY**—a simplicity inconceivable to one who has not taken the pains to examine it. Its superiority to other systems of notation is proved not simply by the very short time required for its acquisition, but by the remarkable facility with which one who has learned it can **GRASP THE PRINCIPLES OF THE OLD SYSTEM.** So thoroughly *methodical* is **PROF. AIKIN'S** system, that less time is required to understand it, and through it the old system, **THAN IS NEEDED FOR THE OLD SYSTEM ALONE.** We speak advisedly in claiming this to be the unquestionable advantage of the new system—an advantage which teachers of children, and of schools in the country, will especially know how to appreciate.
